(54) Title: LARGE-SIZED, MOUNTABLE AND REMOVABLE SHEET ASSEMBLY AND METHOD THEREFOR

(57) Abstract: A large-sized sheet assembly for receiving graphics and/or text from a printer includes a paper facestock, an adhesive film and a release liner. The adhesive film extends over an entire side of the facestock. The release liner covers the adhesive film and may be scored or otherwise provided with lines of weakness such that the release liner may be removed in individual sections. A method of printing and using the large-sized assembly includes printing the assembly with a wide-format printer, such as a wide-format inkjet printer, removing a section of the scored release liner and adhering a section of the sheet assembly to a substrate. Additional sections of the release liner are removed and corresponding portions of the sheet assembly are sequentially adhered to the substrate. The substrate may be a wall, a glass window, or any of a variety of different surfaces.
